

MEDT. JOVIAK

You must be the specialist? We've been waiting for you. Follow me.

TECH. YUMEN

Uh, hi. I was expecting-

MEDT. JOVIAK

No time for that. We have a situation. It's better if I take you there. Come on.

TECH. YUMEN

I was told-

MEDT. JOVIAK

Excuse us! The sooner we get to the lab, the sooner we'll get this mess sorted.

TECH. YUMEN

Mess? What mess? There should ha-

MEDT. JOVIAK

Just to the right here. Make way! (PAUSE) It caught us all by surprise. Just appeared out of nowhere. There were these lights - sounds - it was -

TECH. YUMEN

A-are you al-?

MEDT. JOVIAK

We're here. I brought the specialist.

MEDT. USALIK

Over here, Tech. Yumen. Thank you, Medt. Joviak. Here, Tech Yumen. We've had it under observation and containment. It's quite hostile. We had to inject it with some tranquilizers. Let me show you.

TECH. YUMEN

This creature. Well, I assume is a creature. Why else would you have request my assistance? Right, pardon. Um, it's isolated? There was just one? Are you sure its not native to this planet?

MEDT. USALIK

We don't know. We found it wondering in Sector 67. Locals called it in. We don't know what it is which is why we brought you here. Sector Authority just told us to keep it hidden until an expert arrive. Here we are. Let's take a look, shall we?

TECH. YUMEN

Th-this is-? They're so suppose to be extinct. How-? Where-?

MEDT. USALIK

Do you know what it is? Is it dangerous? I doubt its canivourous. There's no fangs. I know fangs. I got a bite mark from one of those geijals back at the ranch.

TECH. YUMEN

It's - well, it's-

MEDT. USALIK

Yes?

TECH. YUMEN

It's a human being.
